

## Using Smart View UGA Budget Management System

website: [onesource.uga.edu](http://onesource.uga.edu)  
email: [onesource@uga.edu](mailto:onesource@uga.edu)  
service desk: 706-542-0202

---

---

---

---

---

---

---

---

## Agenda

- Introducing SmartView
- Installing and Setting Up SmartView
- Understanding the Database
- Terminology and Concepts
- UGA Dimensional Models
- Logging Into Smart View
- Creating an Ad Hoc Report
- Symmetric vs Asymmetric Reporting
- Hiding and Docking the POV
- Customizing the Quick Access Toolbar
- Using What You Have Learned
- Wrap-Up

---

---

---

---

---

---

---

---

## Objectives

When you complete this course, you will know how to:

- Setting up Smart View
- Understand basic terminology and functionality
- Log in to Smart View
- Create an Ad-Hoc analysis
- Use Smart View tools
- Work with Smart View grids

\*Instructions for installing Smart View are found in the Online Training Library

---

---

---

---

---

---

---

---

## Introducing Smart View

Using Smart View for the UGA Budget Management System

website: [onesource.uga.edu](http://onesource.uga.edu)  
email: [onesource@uga.edu](mailto:onesource@uga.edu)  
service desk: 706-542-0202

## Overview

- Smart View is based on Microsoft Excel to provide an interface for Oracle Hyperion products
- Users use Smart View to
  - View Data from the UGA Budget Management System
  - Import Data to the UGA Budget Management System
  - Model budget data
  - Report on budget data
- Smart View works with Excel, Word, and PowerPoint

## How Smart View Works

- Connects via a URL that points Excel to different environments

## How Smart View Works

- Uses a Provider Service to talk to an application
- The user selects the application based on security

## Installing and Setting Up Smart View

Using Smart View for the UGA Budget Management System

website: [onesource.uga.edu](http://onesource.uga.edu)  
email: [onesource@uga.edu](mailto:onesource@uga.edu)  
service desk: 706-542-0202

## Installing Smart View

- You can find the step-by-step instructions to install Smart View in the OneSource Training Library

## Setting Up Smart View

- This will add a new Smart View Ribbon when you open Excel

- Click on the Options tab to set up Smart View

---

---

---

---

---

---

---

---

## Smart View Shared Connections

- Shared Connections are used to point Smart View to the correct environment URL.
- This will point to the production environment. Enter the production URL on the Options > Advanced page.

---

---

---

---

---

---

---

---

## Shared Connections

- Choose the Advanced option in the Options dialog box to set up Shared Connections
- Shared connections points Smart View to the production environment for retrieving data
- The production environment URL is:  
<https://budgets.onesource.uga.edu/workspace/SmartViewProviders>

---

---

---

---

---

---

---

---

## Understanding the Database

Using Smart View for the UGA Budget Management System

website: onesource.uga.edu  
email: onesource@uga.edu  
service desk: 706-542-0202

## The Database Layer

- Smart View is used primarily to retrieve data
- It is helpful to understand the database structure to understand how data is retrieved
- The UGA Budget Management System is based on a multidimensional database

## Relational Database

- A relational database is a collection with data stored in rows and columns
- When new data is added a new row is added at the bottom
- Each time you search for data, the system scans the table starting at the top

Expense Account	Department	Month	Amount
Travel Expenses	IT	Jan	69155.85
Salaries	Marketing	Jan	10914.1
Travel Expenses	Marketing	Jan	37299.84
Salaries	IT	Jan	90178.34
Office Supplies	Marketing	Jan	34532.74
Salaries	Finance	Jan	2787.84
Office Supplies	Finance	Jan	48203.75
Salaries	Operations	Jan	200000.71
Office Supplies	IT	Jan	27966.28
Travel Expenses	IT	Feb	73810.82
Salaries	Marketing	Feb	98145.88
Salaries	Finance	Feb	61153.23
Office Supplies	Finance	Feb	64093.03
Office Supplies	IT	Feb	97501.17
Salaries	IT	Feb	40906.58
Travel Expenses	Marketing	Feb	87459.96
Salaries	Operations	Feb	200000.71
Computer Hardware	IT	Jan	77161.24

## Multidimensional Database

What are my travel expenses in a specific department in a specific month

- Data is pulled from the relational database in the UGA Financial Management System
- Data is stored in the UGA Budget Management System in a multidimensional database
- Intersections of data dimensions define data storage locations

---

---

---

---

---

---

---

---

## Terminology and Concepts

Using Smart View for the UGA Budget Management System

website: [onesource.uga.edu](http://onesource.uga.edu)  
email: [onesource@uga.edu](mailto:onesource@uga.edu)  
service desk: 706-542-0202

---

---

---

---

---

---

---

---

## Dimensions

- Dimensions are analogous to PeopleSoft chart fields
- Data is located where the dimensions intersect, the database can easily find and retrieve data
- Examples of Dimensions are:
  - Department
  - Account
  - Year
  - Program
  - Fund
- Dimensions can be thought of as the axis of a report or a question you must answer in Smart View

---

---

---

---

---

---

---

---

## Dimension Members

- Dimension Members are analogous to PeopleSoft Chart Field Members
- They are the discrete items that make up a dimension.
- Examples of Dimension Members:
  - 20000000 – Terry College of Business
  - 1952000- CSCI Computer Science
  - FY18
  - 10000 – RI-State Appropriations
- A Dimension member can only belong to a single dimension
- Dimension members can exist at various levels of a hierarchy

---

---

---

---

---

---

---

---

## How Smart View Uses Dimensions and Dimension Members

- Smart View is an Excel interface that allows you to arrange dimensions on various axes of reports
- The axes of the report can be moved around to create the layout the user needs
- Dimension members can be selected to determine exactly what data elements are reported
- Dimension members can be easily changed to create an ad-hoc analysis that unfolds as the user learns more about the data

---

---

---

---

---

---

---

---

## Rows and Columns

Year and Period are stacked on the columns

		FY18	FY18	FY18	FY18
		BegBalance	YearTotal	YTD	Period
4 All Departments	Operating Revenues	1,143,681,248	570,154,685	1,713,835,933	1,143,681,248
5 All Departments	Non-Operating Revenues	479,786,748	124,311,828	604,098,576	479,786,748
6 All Departments	Total Revenues	1,623,467,996	694,466,513	2,317,934,509	1,623,467,996
7 All Departments	Personal Services	1,047,237,400	128,492,598	1,175,729,998	1,047,237,400
8 All Departments	NonPersonal Services	570,911,945	565,699,675	1,136,611,620	570,911,945
9 All Departments	Total Expenses	1,618,149,345	694,192,273	2,312,341,618	1,618,149,345
10 All Departments	Financial Accounts	5,318,651	274,240	5,592,891	5,318,651
11 All Departments	Account	5,318,651	274,240	5,592,891	5,318,651

Entity and Account are stacked on the rows

- Each grid must have at least one dimension on the rows and one dimension on the column
- You can also stack multiple dimensions

---

---

---

---

---

---

---

---

## Point of View (POV)

- When you have a grid, the rows and columns represent the X and Y axis
- The Point of View (POV) provides the Z axis that provide the pages of the report
- The POV contains dimensions that don't exist in columns and rows

---

---

---

---

---

---

---

---

## POV in a Ad Hoc Query

- When used in a Ad Hoc query the POV box that can be "docked" at one edge of the grid or it can "float" in the main worksheet area of Excel.

	A	B	C	D	E	F	G	H
2	Period							
3	Operating Revenues	#No Access						
4	Non-Operating Revenues	#No Access						
5	Total Revenues	#No Access						
6	Personal Services	#No Access						
7	NonPersonal Services	#No Access						
8	Total Expenses	#No Access						
9	Financial Accounts	#No Access						
10	Account	#No Access						
11								

Example of POV docked at top of screen

---

---

---

---

---

---

---

---

## Examples of Docked POVs

	A	B	C
2	Period		
3	Operating Revenues	#No Access	
4	Non-Operating Revenues	#No Access	
5	Total Revenues	#No Access	
6	Personal Services	#No Access	
7	NonPersonal Services	#No Access	
8	Total Expenses	#No Access	
9	Financial Accounts	#No Access	
10	Account	#No Access	
11			
12			

Example of POV docked at right side of screen

	A	B	C	D	E	F	G	H
2	Period							
3	Operating Revenues	#No Access						
4	Non-Operating Revenues	#No Access						
5	Total Revenues	#No Access						
6	Personal Services	#No Access						
7	NonPersonal Services	#No Access						
8	Total Expenses	#No Access						
9	Financial Accounts	#No Access						
10	Account	#No Access						
11								
12								
13								
14								
15								

Example of POV floating in content area

---

---

---

---

---

---

---

---

## Manual POV Line

- Use the first row as the POV line
  - Only when using an Essbase connection

	A	B	C	D	E	F	G	H	I	J	K
1		Program	Fund	Location	Department	Class	Project	Legacy	Chart	Scenario	Year
2		Period									
3		Operating Revenues	#No Access								
4		Non-Operating Revenues	#No Access								
5		Total Revenues	#No Access								
6		Personal Services	#No Access								
7		NonPersonal Services	#No Access								
8		Total Expenses	#No Access								
9		Financial Accounts	#No Access								
10		Account	#No Access								
11											
12											

First row can act as the POV.

## Hierarchies

Year  
Q1  
Jan  
Feb  
Mar  
Q2  
Apr  
May  
Jun  
Q3  
Jul  
Aug  
Sep  
Q4  
Oct  
Nov  
Dec

Months  
add up to  
quarters,  
quarters  
add up to  
years

- Hierarchies organize data into different levels
- The top level is the default when the data is not broken down

## Drilling

Expanding the Hierarchy Options

- Double-click
- Ribbon options
- Right Click

	A	B	C
1		All Programs	All Fund Type
2		Total Revenues	
3		YearTotal	1,391,202,958
4			
	A	B	C
1		All Programs	All Fund Types All
2		Total Revenues	
3		Q1	586903525.5
4		Q2	485047937.4
5		Q3	319251494.9
6		Q4	0
7		YearTotal	1,391,202,958
8			
9			
10			

An example of drilling into the "YearTotal" value to see the quarterly detail underneath.

## A Warning About Drilling

- Drilling is a powerful tool for investigating data and find the details that make up data. However as you drill in it is possible to retrieve thousands or even millions of rows of data
- Retrieving too much data into Excel can cause performance slowdowns
- If you accidentally retrieve too much data restarting Excel or your laptop will usually fix the performance issue.

---

---

---

---

---

---

---

---

## Hierarchy Terminology

- “Genealogical” or “family tree” language used to describe the positions of dimension members
  - Parent/Child
  - Ancestor/Descendants
  - Siblings
  - Generation
  - Levels
- Alternate hierarchies
  - If a dimension contains more than one hierarchy, the first value is referred to as the main or base hierarchy
  - Any others are called alternate hierarchies
  - If a member appears in a hierarchy more than once, subsequent appearances are called shared members

---

---

---

---

---

---

---

---

## Parent/Child

“Jul”, “Aug” and “Sep” are all **children** of “Q1”.

Likewise, the **parent** of “Q1”, “Q2”, “Q3” and “Q4” is “YearTotal”.

---

---

---

---

---

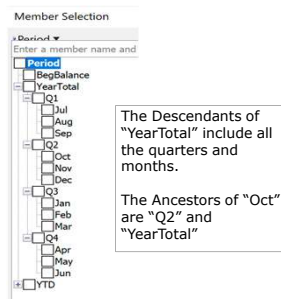

---

---

---

## Ancestor/Descendents

- Extending across more than one level in the hierarchy
- Ancestor: All members above a particular member (includes the parent)
- Descendant: all members beneath a particular member (includes the child or children)

---

---

---

---

---

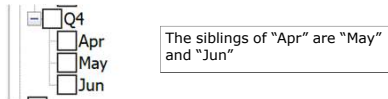

---

---

---

## Siblings

- Share the same parent

---

---

---

---

---

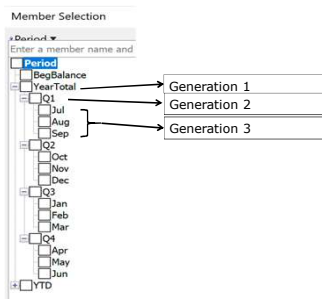

---

---

---

## Generation

- A number that represents the distance to the top of the hierarchy.
- The generation number starts with "1"
- A particular member only has one generational number within a hierarchy

---

---

---

---

---

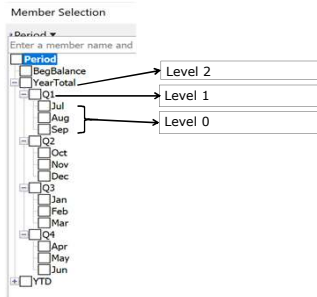

---

---

---

## Level

- A number that represents the distance up from the bottom of the hierarchy.
- The generation number starts with "0"
- A particular member only has one generational number within a hierarchy

## Levels in an Unbalanced Hierarchy

In this example, "Libraries" is made up of multiple branches of the family tree, "Libraries", "Libraries Materials", "The Press", etc.

If we start at member "15115001" and walk up the hierarchy using the "Libraries" branch, we would count and say that "All Departments" is at level 5

## Levels in an Unbalanced Hierarchy

However, if we start at member "42013000" and walk up the hierarchy using the "VP for Instruction" branch, we would count and say that "All Departments" is at level 3.

If you are at Level 0, you are always at the bottom of the hierarchy (also called the "leaf" level)

## UGA Dimensional Models

Using Smart View for the UGA Budget Management System

OneSource  
UNIVERSITY OF GEORGIA

website: onesource.uga.edu

---

---

---

---

---

---

---

## Logging In to Smart View

Using Smart View for the UGA Budget Management System

OneSource  
UNIVERSITY OF GEORGIA

website: onesource.uga.edu  
email: onesource@uga.edu  
service desk: 706-542-0202

---

---

---

---

---

---

---

---

## Log In to Smart View

- Go to the Smart View ribbon in Excel.
- Click on the Panel icon.

The Smart View Panel Opens

---

---

---

---

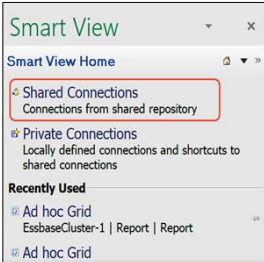

---

---

---

---

## Log In to Smart View

- Click the Shared Connections Option  
*A dropdown asks you to select a provider.*

---

---

---

---

---

---

---

---

## Log In to Smart View

- Enter your MyID credentials to connect to the UGA Budget Management System
- Click the **Connect** button.

---

---

---

---

---

---

---

---

## Log In to Smart View

Smart View can identify with different types of applications. You will need to select the database you want. This is the Provider.

- Select the appropriate Provider.

---

---

---

---

---

---

---

## Log In to Smart View

“Oracle Essbase” is the Essbase Provider.

- Report Application

“Oracle Hyperion Planning, Fusion Edition” is the Planning Provider

- Personal Application
- Amendment Application
- Budgeting Application (future)

---

---

---

---

---

---

---

## Private Connections

You can create a library of connections that you use frequently.

- As you drill down, you can right-click on the database and select **Add to Private Connections**.

---

---

---

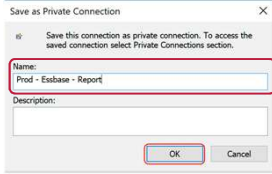

---

---

---

---

## Naming your Private Connection

- A good practice to naming your connection is to provide three pieces of information: the environment name, the provider type, and the database or application name.

---

---

---

---

---

---

---

## Selecting a Private Connection

After you have saved your favorites you can select Private Connections when opening Smart View.

You will then be asked to select a provider

---

---

---

---

---

---

---

## Creating an Ad Hoc Query

Using Smart View for the UGA Budget Management System

---

---

---

---

---

---

---

## Starting your Ad Hoc Query

- Click on the database you want for your query. If you haven't established a connection you will need to login.

---

---

---

---

---

---

---

---

## Starting your Ad Hoc Query

- Right click on the database name or use the menu in the bottom right corner on the Smart View panel to select **Ad hoc analysis**

---

---

---

---

---

---

---

---

## Starting an Ad Hoc Query

- If you select an application your menu will prompt you to select a database.

- After you select the database, the ad hoc query grid will open. If there is data from a prior session, you will be asked if you want to clear the contents.

---

---

---

---

---

---

---

---

## Starting an Ad Hoc Query

- The grid that opens may be different on which provider you select.

Planning Provider Grid				
	A	B	C	D
1	Account	Jul	#No Access	
2	Financial Accounts		251,661	PO... x
3	Total Revenues		452,068,045	PIB
4	Total Expenses		451,816,384	Current Budget
5	Position Details		#Missing	Final
6				All Departments
7				All HR Departments
8				All Clones
9				All Fund Types
10				All Locations
11				All Programs
12				All Projects
13				Refresh
14				

Essbase Provider Grid						
	A	B	C	D	E	F
2			Period			
3			Year			
4	Account	All Departments	5,080,995	P... x	All Programs	
5					Fund	
6					Class	
7					Plan	
8					Project	
9					Legacy Chart	
10					Scenario	
11					Refresh	
12						
13						
14						

## Context Sensitive Ribbons

- Different ribbons are displayed for different types of Ad Hoc Queries. Shown below is the Smart View ribbon.

- After connecting a menu specific to the active connection with all necessary commands for a data source displayed on one ribbon.
- Some commands may appear on more than one ribbon.

## Other Ribbon Examples

Planning Ribbon

Planning Ad Hoc Ribbon

Essbase Ribbon (Ad Hoc)

## Ad Hoc Analysis Tools

- There are several tools that are helpful in ad hoc analysis. Let's explore the following.
- Refresh
- Submit Data
- Member Selector
- Zoom In
  - Next Level
  - All Levels
  - Bottom Level Same Level
  - Sibling Level
  - Same Generation Level
  - Formula
- Retaining Selected Member
- Ancestor Position
- Pivot
  - Planning Pivot
  - Essbase Pivot
  - Dragging and Dropping
- Keep Only
- Remove Only
- Change Alias
- Cascade

---

---

---

---

---

---

---

---

## Pivot Tool

- The Pivot Tool allows you to switch the axis on which a dimension is reported.
- The default behavior of the pivot tool depends on the type of connection you are using.

---

---

---

---

---

---

---

---

## Pivot Tool with Planning Connection

The Pivot tool in a planning connection where you have selected a dimension on the column will pivot to the rows. If you are on a row, it will pivot to the column

---

---

---

---

---

---

---

---

## Planning Pivot to POV

- You can use the pivot to POV dropdown to send a row or column dimension to the POV

## Pivot Tool with Essbase Connection

The Pivot tool in an Essbase connection where you have selected a dimension on the column will pivot to the rows.

## Pivot Tool with Essbase Connection

If you are using the top row of the grid as the POV and Pivot, it will go to the rows.

## Pivot Tool with Essbase Connection

You must always have at least one dimension on the row and column. If you attempt to pivot with the last dimension on the row or column, you will get the error below:

## Dragging and Dropping

- You can also change the axis a dimension is on by dragging and dropping.
- For dimensions that are in the rows or columns, right click and hold down to drag and drop.

	A	B	C	D
2		Jul	Aug	Sep
3		Actuals	Actuals	Actuals
4	Account	215,500,093	15,699,971	15,020,100
5				
6				
7				

When released the grid will redraw, pivoting the dropped dimension.

	A	B	C	D	E
2		Jul	Aug	Sep	
3	Account	Actuals	215,500,093	15,699,971	15,020,100
4					
5					
6					

## Drag and Drop in Essbase

- You can drag from the grid to the POV.

	A	B	C	D
2		Jul	Aug	Sep
3		Actuals	Actuals	Actuals
4	Account	215,500,093	15,699,971	15,020,100
5				
6				
7				
8				
9				
10				
11				
12				
13				
14				
15				
16				

	A	B	C	D	E
2		Jul	Aug	Sep	
3	Account	Actuals	215,500,093	15,699,971	15,020,100
4					
5					
6					
7					
8					
9					
10					
11					
12					
13					
14					
15					
16					
17					
18					

## Drag and Drop from POV to Grid

For both Essbase and Planning connections, you can right or left click on the dropdown button next to the dimension name in the POV to initiate the drag from the POV to a grid.

## Refresh

- The refresh button lets you take data from the grid you have defined and pull it into Smart View.
- If you don't have a grid open, it will open a new grid.
- If you have a grid open, data will be imported into that and will overwrite any unsaved data you might have.

## Submit Data

- Submit Data uploads the changes you make to Smart View into the underlying database.
  - You must have write access to the database to do this.
  - Generally, it is better to use planning applications instead of the database to limit this.

## Member Selector

The member selection tool allows you to navigate dimension members using a GUI interface. Selections can be placed on rows and columns

---

---

---

---

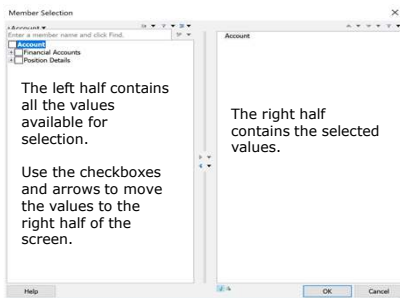

---

---

---

---

## Member Selector

The Member Selector is split into two main areas.

---

---

---

---

---

---

---

---

## Member Selector

Use the search box at the top of the screen to perform text-based searches of the data. Wildcards are star (\*) and question marks (?). The drop-down box to the right of the field controls how the search works.

The direction keys at the bottom of the box control whether values are inserted into columns or rows.

---

---

---

---

---

---

---

---

## Options Setup

- Use the Options button on the Smart View ribbon to control how data is displayed

---

---

---

---

---

---

---

---

## Data Options Set Up

- Choose the Data Options option in the Options dialog box.

### Suppression

Smart View has the ability to hide rows and columns of data that are missing. When it does this we say the row or column is "suppressed". This is controlled from the smart view "Data Options" dialog box.

---

---

---

---

---

---

---

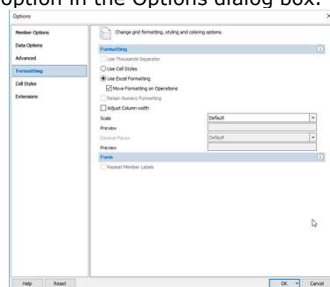

---

## Data Options Set Up

- Choose the Formatting option in the Options dialog box.

### Excel Formatting

The easiest way to format data though is to use the normal excel formatting options. To use excel formatting make sure you have the "Use Excel Formatting" and "Move Formatting on Operations" option selected.

---

---

---

---

---

---

---

---

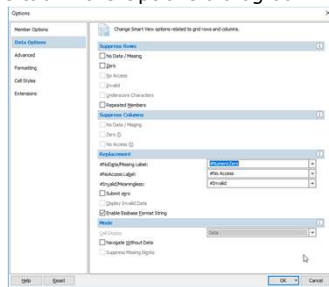

## Data Options Set Up

- Choose the Data Options tab in the Options dialog box.

### Numeric Zero

Another very useful option is the ability to define missing data as "Numeric Zero".

## Zoom In

The various Zoom in tools give control over drilling into and out of data.

## Zoom In Options

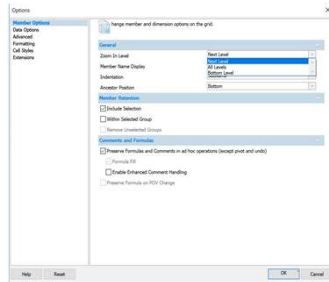

There are several options when zooming into data.

- 1 level down
- All levels
- The bottom level of a hierarchy

## Zoom Behavior

The default behavior is set up on Member Options page of the Smart View options dialog. Select the Zoom In Level option used most often as the default.

---

---

---

---

---

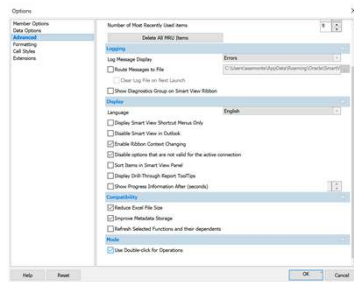

---

---

---

## Zoom in Option

If you selected "Use Double-click for Operations" on the Advanced options page, the Zoom In Level action you chose on the Member Options page will be performed when you double-click.

---

---

---

---

---

---

---

---

## Zoom In Option

No matter what you choose as the default, you can change the type of zoom using the zoom in drop-down list on the right side of the button in the ribbon.

Zooming in is based on a starting point in the hierarchy that is determined by the dimension member currently selected in the grid.

---

---

---

---

---

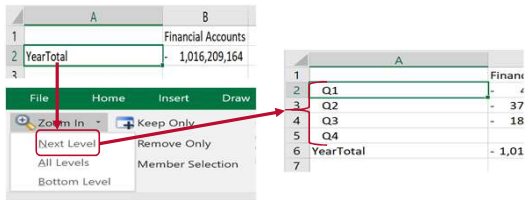

---

---

---

## Next Level Zoom

Zooming to the next level opens up the next level down in the hierarchy.

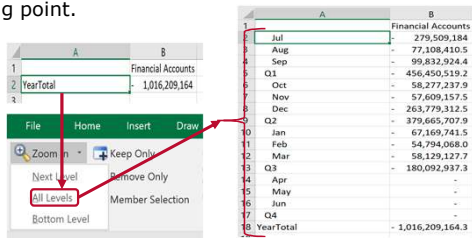

A	B
1	Financial Accounts
2	YearTotal - 1,016,209,164

A	B
1	Financial Accounts
2	Q1 - 37
3	Q2 - 18
4	Q3 - 18
5	Q4 - 18
6	YearTotal - 1,016,209,164

## All Levels Zoom

Zooming to all levels will open up all values beneath the starting point.

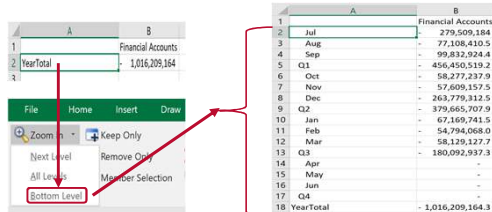

A	B
1	Financial Accounts
2	YearTotal - 1,016,209,164

A	B
1	Jul - 279,509,184

The screenshot shows the 'File' menu with 'Zoom In' selected. On the right, the 'Show Details' pane lists various options, with 'Same Level' highlighted by a red box and a red arrow pointing to it from the 'Zoom In' button.

[illegible]

The screenshot shows the 'Naming Options' dialog box. The 'General' tab is active. The 'Show Number' checkbox is checked. The 'Number Name Display' dropdown is set to 'Number Name Only'. The 'Indexation' dropdown is set to 'Subitems'. The 'Comments and Footnotes' section is expanded, showing 'Insert Footnote and Comments on all the operations (except group and unit)', 'Promote All', 'Disable Inherited Comment Changing', and 'Promote Footnote on PIV Change'.

## Zoom Retaining Selected Member

**Member Retention**  
☒ Include Selection

## Zoom Out

- Zoom Out is the opposite of Zooming In.
- It moves from the selected member one step up the hierarchy.

## Keep and Remove

The Keep and Remove tools allow you to easily subset the data in your grid.

## Keep Only

It is possible to select more than one dimension member (use control or shift keys) when using the Keep or Remove option.

	A	B	C	D
2		Actuals	Actuals	
3		FY18	FY17	
4	Jul	Personal Services	64274826.81	67695691.78
5	Jul	NonPersonal Services	25187253.85	28460195.48
6	Jul	Total Expenses	89,462,081	96,155,887
7	Aug	Personal Services	92827252.92	91693309.26
8	Aug	NonPersonal Services	67767805.82	53205809.22
9	Aug	Total Expenses	160,590,559	144,899,118
10	Sep	Personal Services	84823418.44	87824265.9
11	Sep	NonPersonal Services	37207244.89	42670613.79
12	Sep	Total Expenses	122,030,663	130,494,880
13	Oct	Personal Services	85346446.06	83777349.48
14	Oct	NonPersonal Services	33608381.58	36640014.74
15	Oct	Total Expenses	118,954,828	120,417,364

It is keeping the selected members, not the rows or columns. In this example, July & Aug were selected on rows 6 & 7. All occurrences were saved, not just the ones on rows 6 & 7.

## Remove Only

The Remove Only option is similar. It removes values from the grid instead of keeping them.

	A	B	C	D
2		Actuals	Actuals	
3		FY18	FY17	
4	Jul	Personal Services	64274826.81	67695691.78
5	Jul	NonPersonal Services	25187253.85	28460195.48
6	Jul	Total Expenses	89,462,081	96,155,887
7	Aug	Personal Services	92827252.92	91693309.26
8	Aug	NonPersonal Services	67767805.82	53205809.22
9	Aug	Total Expenses	160,590,559	144,899,118
10	Sep	Personal Services	84823418.44	87824265.9
11	Sep	NonPersonal Services	37207244.89	42670613.79
12	Sep	Total Expenses	122,030,663	130,494,880
13	Oct	Personal Services	85346446.06	83777349.48
14	Oct	NonPersonal Services	33608381.58	36640014.74
15	Oct	Total Expenses	118,954,828	120,417,364

It is keeping the selected members, not the rows or columns. In this example, July & Aug were selected on rows 6 & 7. All occurrences were saved, not just the ones on rows 6 & 7.

## Change Alias

The Change Alias button allows you to control the alias table that is displayed in a grid (or if no alias table is used)

## Change Alias

Tip: If you are using a private connection, you can change the default alias table associated with the connection by right clicking on the connection name.

## Cascade

Cascade allows you to take any dimension values selected in the POV and expand them out across multiple Excel tabs.

## Performing a Cascade Operation

- When performing a cascade operation, it is possible to have the new tabs be in the same workbook, a new workbook, or different workbooks.
- If you select Different Workbooks, it will open a different workbook for each permutation instead of different tabs.

## Using Member Selection

When you open the cascade dialog box, you'll be prompted to choose multiple values for any dimension that exists in the POV. Use the Member Selection tool to select the values you want.

---

---

---

---

---

---

---

---

## Cascade Results

Smart View will create a new tab (or workbook) for each selected value.

---

---

---

---

---

---

---

---

## Undo/Redo

- The native Undo and Redo functionality in Excel does not work with Smart View.
- There are separate undo and redo functions on the SmartView ribbon.
- These can undo and redo many tasks.
- These cannot undo a data submission in a data form.

---

---

---

---

---

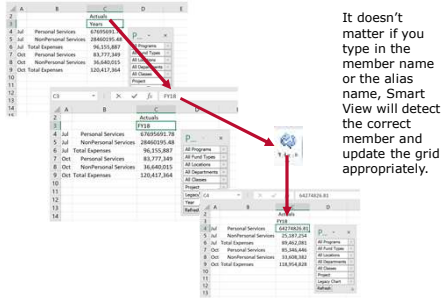

---

---

---

## Select Members by Typing

If you know the name of a member, you can simply type it in the correct location in the grid. Then when you press refresh, the grid will update appropriately.

It doesn't matter if you type in the member name or the alias name, Smart View will detect the correct member and update the grid appropriately.

## Selecting Members by Typing

You can add new members into an adjacent cell to expand the grid. Be sure that all dimensions for that axis are fully accounted for.

Typing "FY17" into D2 will result in an error, because the period dimension is also on the columns.

Database Error (10002): Member (FY17) is not in place.

## Selecting Members by Typing

In the example below, the number of columns is expanded because all dimensions are accounted for.

## Deleting Rows and Columns

- Use the normal Excel Delete Row or Delete Column functions to re-draw a grid and refresh. This can be an easy way to remove data.

After deleting the row in Excel and refreshing, the grid will continue to function normally.

---

---

---

---

---

---

---

---

## Symmetric vs Asymmetric Reporting

Using Smart View for the UGA Budget Management System

website: [onesource.uga.edu](http://onesource.uga.edu)  
email: [onesource@uga.edu](mailto:onesource@uga.edu)  
service desk: 706-542-0202

---

---

---

---

---

---

---

---

## Symmetric vs Asymmetric Reporting

- The default behavior for Smart View is for data to expand symmetrically.
- This means that when there is more than one dimension on an axis, any expansion of one dimension will happen for all permutations of the other dimension members on that axis.

---

---

---

---

---

---

---

---

## Symmetric Example

If you zoom in one level on Q1, the grid grows symmetrically.

	A	B	C
2			Actuals
3	FY18	Q1	120163304.6
4	FY17	Q1	124336618.5
5			

	A	B	C
2			Actuals
3	FY18	Jul	25187253.85
4	FY18	Aug	67767805.82
5	FY18	Sep	37207244.86
6	FY18	Q1	130162304.6
7	FY17	Jul	28,460,195
8	FY17	Aug	53205809.22
9	FY17	Sep	42670613.75
10	FY17	Q1	124336618.5
11			
12			

## Asymmetric Example

- If you only want to see a select combination of dimensions on the rows, you can manually type in values and delete rows to just retain the values you want.
- Not every member of the first dimension would be associated with every member of the second dimension.

	A	B	C
2			Actuals
3	FY18	Jul	25,187,254
4	FY18	Aug	67,767,806
5	FY17	Sep	42,670,614
6			

## Hiding and Docking the POV

Using Smart View for the UGA Budget Management System

OneSource  
UNIVERSITY OF GEORGIA

website: onesource.uga.edu  
email: onesource@uga.edu  
service desk: 706-542-0202

## The Floating POV Box

- Use the POV button to display the floating POV box
- You have the ability to either hide or dock the POV box at any time in a Planning or Essbase query.

The POV button will hide the POV box.

## Essbase with Floating POV

Essbase with floating POV

	A	B	C	D
2		Period		
3	Total Revenues	0		
4	Total Expenses	0		
5	Financial Accounts	0		
6	Account	0		
7				
8				
9				
10				
11				
12				
13				
14				

Essbase with 1st Row as POV

	A	B	C	D	E	F	G	H	I	J
2										
3										
4										
5										
6										
7										
8										

You can toggle between having a separate POV box and using the first row of the grid.

You can only use the first row as the POV on an Essbase connection.

## Docking the POV

- Grab the top part of the floating POV with your mouse and drag it to one of the edges of the screen.
- You can dock on the top, bottom, left or right side of the screen.

	A	B	C	D
1		FY18	Actuals	All Programs All Fun
2		Period		
3	Total Revenues	0		
4	Total Expenses	0		
5	Financial Accounts	0		
6	Account	0		
7				
8				
9				
10				
11				
12				
13				
14				

## Undocking the Toolbar

- Undocking is the reverse. Grab the top of the docked POV and drag it to the center part of the grid

## Customizing the Quick Access Toolbar

Using Smart View for the UGA Budget Management System

OneSource  
UNIVERSITY OF GEORGIA

website: [onesource.uga.edu](http://onesource.uga.edu)  
email: [onesource@uga.edu](mailto:onesource@uga.edu)  
service desk: 706-542-0202

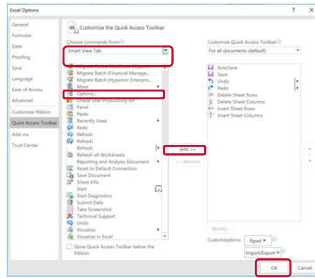

## Customizing the Quick Access Toolbar

- Using standard Excel functionality you can customize the Quick Access Toolbar at the top of the Excel screen.
- To start, open the ribbon you want to customize.
- Right-click and select Customize Quick Access Toolbar from the menu that appears.

## Customizing the Quick Access Toolbar

- In the Choose commands from field, select the ribbon or All Commands option to find the shortcut you are interested in.
- Select the shortcut to add.
- Click the Add button in the middle.
- When the shortcut is added to the right side, click on OK.

email: onesource@uga.edu  
service desk: 706-542-0202

## Summary

During this training, you have learned to:

- Configure Smart View to create ad hoc reports
- Understand basic terminology and functionality
- Log in to Smart View
- Create an Ad-Hoc analysis
- Use Smart View tools
